

INVITATION TO VISUEL EFFECTS SEMINAR

Dundee, Scotland

Wednesday January 26 to Saturday January 29 2011

North Sea Screen Partners, FilmFyn and Tietgen Business College invites TV- and filmproducers as well as visual effects artists to a seminar in Dundee, Scotland.

Come and join the seminar and get an intensive and comprehensive introduction to the brand new state of the art Visual Effects Research Lab in Dundee – and a status on the new research and equipment. The participants will learn how

to benefit from the results of the new lab and how to work together across borders on visual effects projects.

The seminar will also include networking with the local film- and computergame industry, and we will join the Dundee College for an event during their Global Gathering- programme going on at the same time.

DEADLINE JANUARY 15.

ABOUT VERN AND VERL:

The aim is to:

- establish a 'High end' trans national visual effects research network (VERN) and laboratory (VERL) based in The North Sea Region

- equip the laboratory and network with state of the art visual effects hardware and software, which may be, utilized by North sea region partners and North Sea region creative industries.

- foster and develop a cluster of innovative high tech visual effects companies and micro SMEs within the region and aid managers to engage with new, innovative technology and the growth of the sector as a whole.

- establish protocols and the sharing of best practice for visual effects within the North Sea Region

- invite established visual effects artists and producers to use the facilities to research innovative solutions to visual effects research questions pertinent to the film, digital media, television and games industries.
